AC 2-wire Inductive Sensors

Cylinder designs, M12x1

AC sensors are optimized for processor units and controllers with alternating current input. These sensors are mainly used in Asia and America. When maintaining the rated operating current, the sensors can directly control fuses and relays.

Recommendation

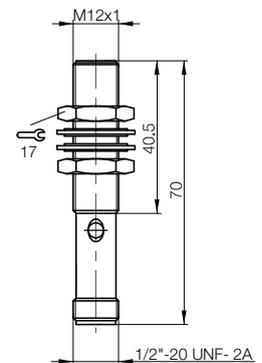

Short-circuit protection equipment: Miniature fuse in accordance with IEC 60127-2 Sheet 1, ≤ 2 A (fast-acting). See attachment-Circuit diagrams. After a short-circuit, check the device for proper function.
