

# Capacitive Global Sensors

## Capacitive Global sensors – above-average technology at the best price

For object and level detection, capacitive Global sensors are particularly cost-effective. They offer a wide range of performance-proven products in above-average technology with the best possible EMC protection at a low price.

The complete series includes M12, M18 and M30 variants in cable version and with M12 male. In a plastic or stainless steel housing. This guarantees maximum versatility in application.

All sensors can be easily adjusted to applications via potentiometers.

### Features

- **Stainless steel or plastic housing (PBT)**
- **PNP and NPN versions with normally open or normally closed**
- **Power-on indicator (large green LED)**
- **Output function indicator (large yellow LED)**
- **High electromagnetic compatibility (EMC)**

# Capacitive Global Sensors

### Capacitive Global Sensors for Object Detection

#### Cylinder Designs

|         |    |
|---------|----|
| M12x1   | 58 |
| M18x1   | 59 |
| M30x1.5 | 60 |

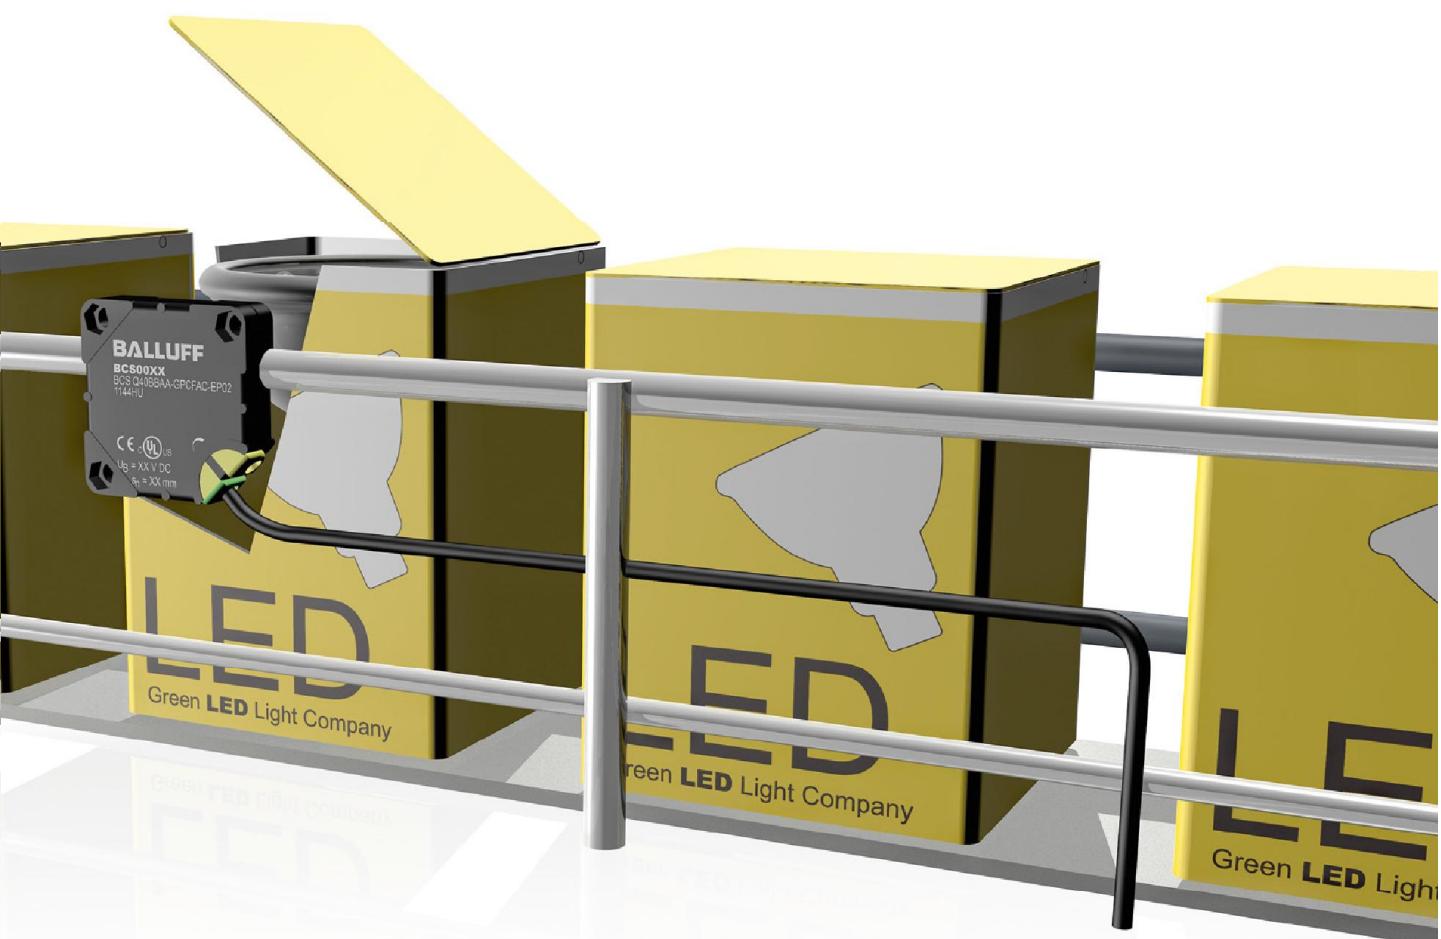

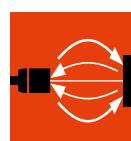

#### Block Designs

|             |    |
|-------------|----|
| 40x40x10 mm | 62 |
| 16x34x8 mm  | 63 |

### Capacitive Global Sensors for Level Detection

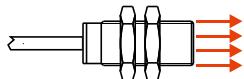

#### Cylinder Designs

|         |    |
|---------|----|
| M12x1   | 64 |
| M18x1   | 65 |
| M30x1.5 | 66 |

### Object Detection

- Flush-mount
- Extended switching distance
- For example, detecting plastic parts

Flush-mount capacitive sensors detect objects reliably, even from a great distance.  
Regardless of color, structure and material.

### Shielded sensors

Fields of application

#### Solid body object detection

Paper, cardboard, glass, plastic, rubber, ceramic, wood, metal, fiber composite material, semiconductors (wafers) etc.

#### Level object detection

through non-metallic container wall  
(max. 4 mm thickness)

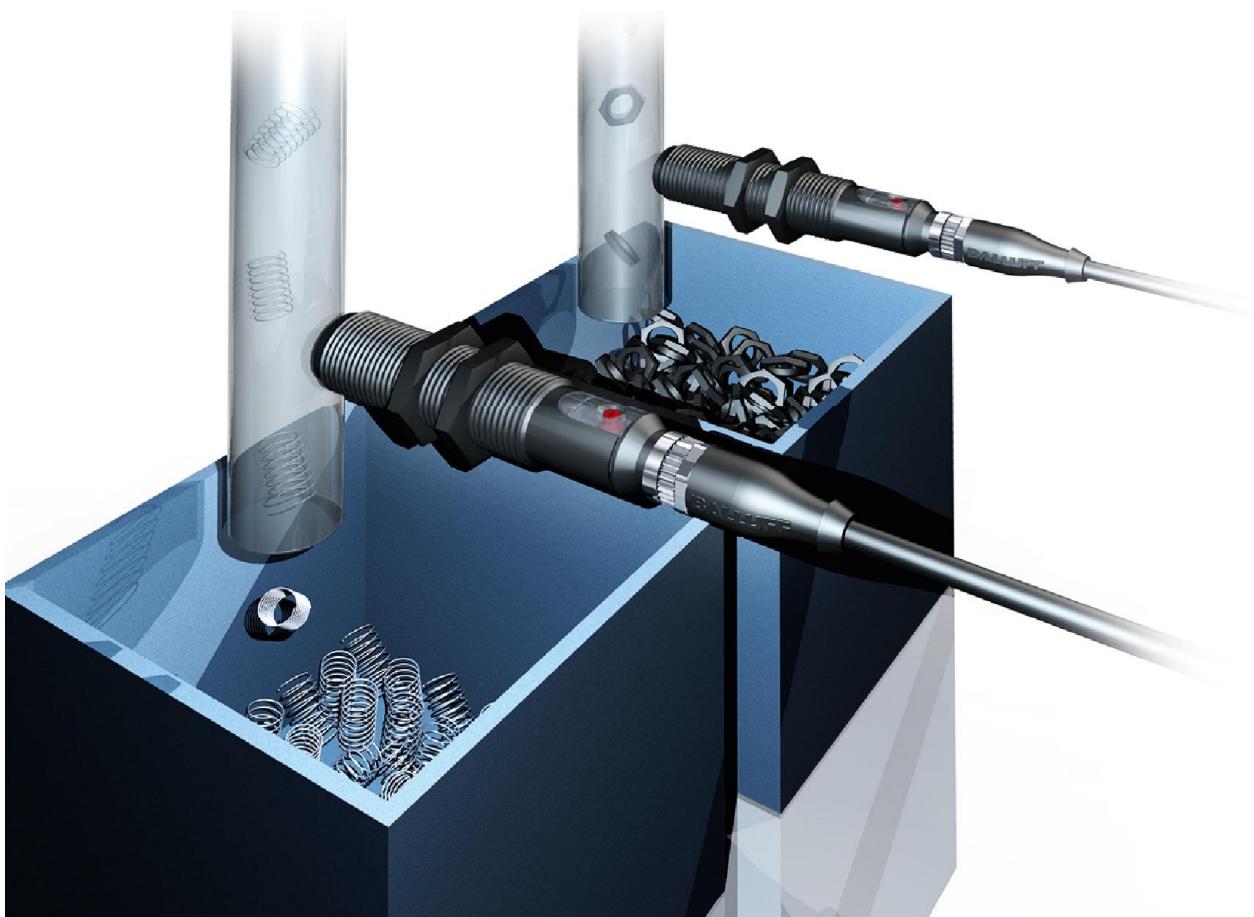

Granules, pellets, powder, sand etc.

Objects in outer packaging  
(volume or presence)

Oils, grease, water, alcohol etc.

### Benefit

The concentrated electrical field enables also to detect media with a low dielectric constant reliably.  
(electrically weak or non-conductive, non-metallic materials).

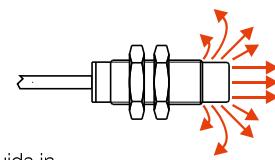

# Capacitive Global Sensors

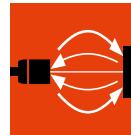

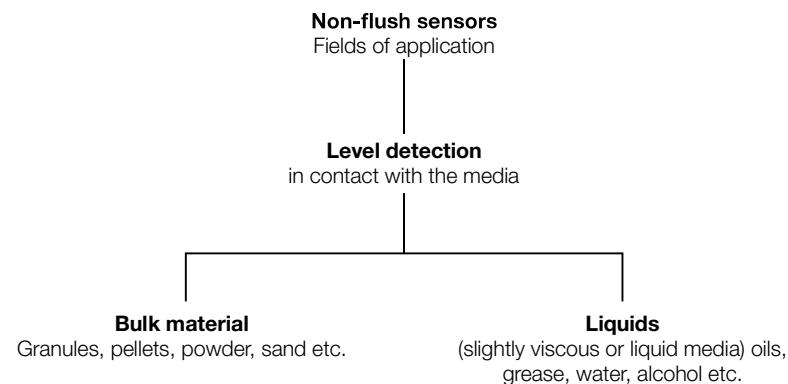

## Performance spectrum

### Level detection

- Non-flush mount: improved adhesion compensation
- User adjustable sensitivity

Non-flush mount Global sensors are ideal for level detection of bulk materials or liquids in direct contact. Material deposits are suppressed reliably in the process.

Capacitive Global Sensors

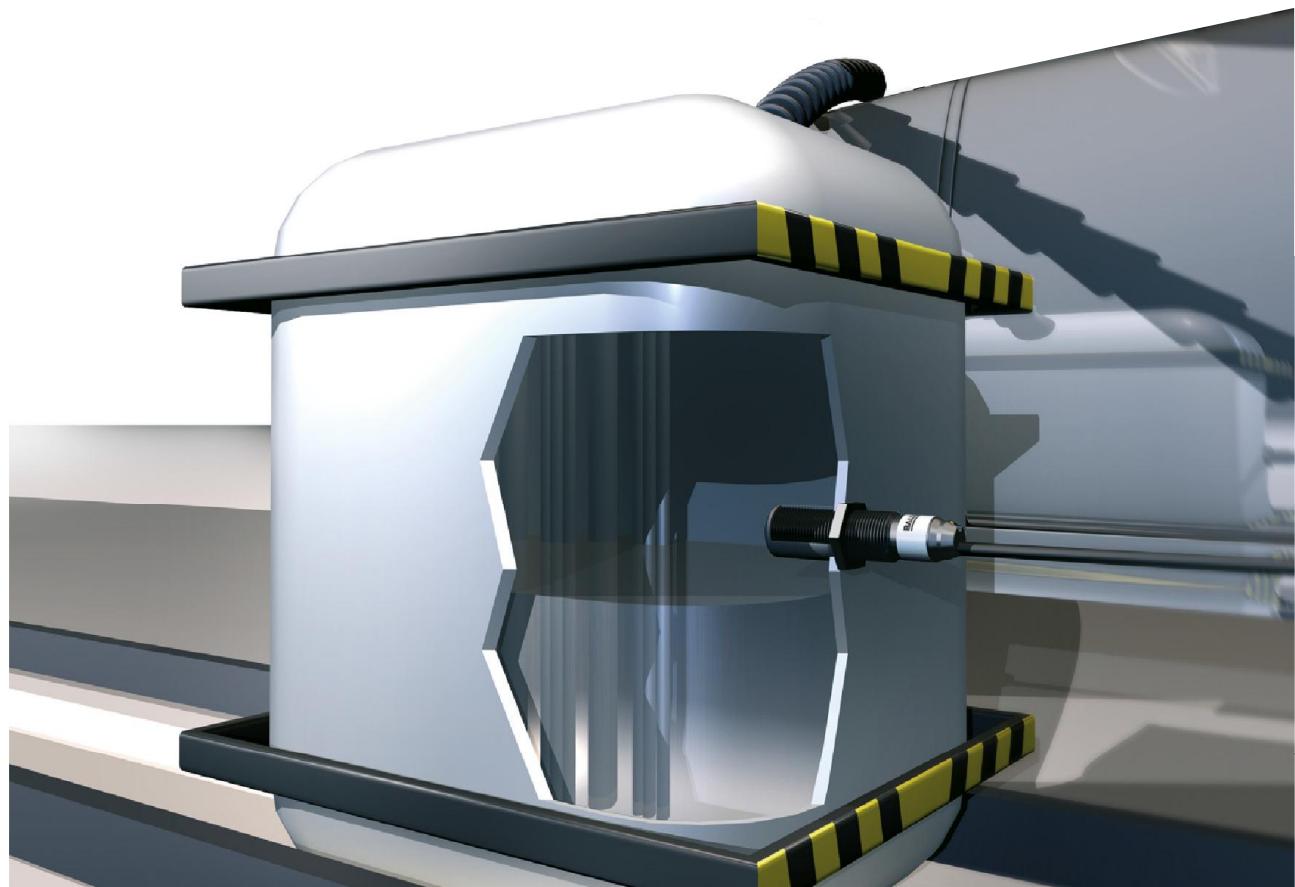

Performance Spectrum

Capacitive Sensors for Object Detection, Cylinder Design, Block Design

Capacitive Sensors for Level Detection, Cylinder Design

### Benefit

Their spherical electrical field effectively compensates for material adhesion on the sensing face.

**Capacitive Global Sensors**
