

# Capacitive Sensors for Level Detection

## SmartLevel, immersion sensors, DC 3-wire, M12 x 1, G½"

### Flexible use: in plastic or metal

BCS capacitive immersion sensors detect levels of plastic granulates or highly conductive media with absolute reliability. Their excellent foam and build-up compensation makes them highly flexible. They can be installed in plastic or metal tanks.

### Benefits

- High-quality 1.4404 (316L) stainless and PEEK housings
- Wire connection for remote teach-in
- EHEDG conformal with special approved adapters
- Media temperature up to 105 °C
- Autoclave compatible (1 h)
- IO-Link versions available
- Pressure rated to 10 bar and IP69K at the M12 connector

### Applications

- Detect plastic granulates up to 105 °C
- Sense adhering foods such as yogurt, milk, beverages etc.
- Detect highly conductive acids and bases up to a value of 100 mS/cm

The BCS capacitive immersion sensor reliably detects the level of a milk tank.

Size
Installation type
Rated switching distance $s_n$
PNP, NO
PNP, NC
NPN, NO
NPN, NC
IO-Link, PNP/NPN and NO/NC can be coded
Supply voltage $U_s$
Voltage drop $U_d$ at $I_b$
Rated insulation voltage $U_i$
Output current max.
No-load supply current $I_0$ max.
Polarity reversal protected/transposition protected/short-circuit protected
Ambient temperature $T_a$ /media temperature
Switching frequency $f$
Output function indicator
Degree of protection per IEC 60529

### Optimal installation

The capacitive immersion sensors are to be installed in combination with the EHEDG conformal adapters shown here. They are approved for level detection in the European foods industry.

### Benefits

- Housing stainless steel 1.4404 (316L)
- EHEDG approved when used with Balluff BCS immersion sensor
- Other special versions upon request

Stainless steel adapter for hygienic installation of the Balluff BCS immersion sensor.
